<b>World Countries, Areas &amp; Populations</b>	<b>63-67</b>

#### Explanatory Notes on World Map

The World Map is segmented into six (6) sections, each representing a designated region for quick reference purposes and to overcome repetition of some countries appearing in more than one map :-

Due to space constraint, the Arctic, Antarctica zones and certain isolated places outside the range, e.g. Hawaii, Solomon Islands are not covered in this World Maps. China, India and other South East Asia countries are also shown separately from other Asian Countries. In order to focus greater attention on *World Major Tourism Destinations*, some minor deviation from scales is inevitable.
